### EXCLUSIONS AND LIMITATIONS

Coverage does not apply in the following: Engines lacking manufacturer-recommended maintenance, as are vehicles with altered or undocumented odometer or ECM changes. Failures of or caused by any altered component are not covered, nor is repair or replacement of components not listed under covered items. Damage arising from collision, fire, abuse, neglect, or acts of God is excluded, including transmission and axle failures from spinout or shock-load. Repairs resulting from failure to maintain prescribed fluid levels, grades, and filters; improper towing; or other operational abuse are similarly excluded, as is chemical or mechanical erosion – including cylinder liner cavitation from improper coolant maintenance. No coverage is provided for engine-braking device repairs or damage caused by their failure, nor for loss of use, lost time, lost profits, rental charges, or any consequential or punitive damages. Towing, freight, and travel charges are not covered, and repairs made solely for fuel economy or EPA compliance are excluded. Coverage does not extend to vehicles not registered for commercial on-highway use, to post-delivery modifications determined to have caused or worsened a failure, to transmission or rear differential repairs where the engine has been upgraded beyond their rated capacity, or to vehicles registered or operated outside of North America.

See contract for a full list of exclusions.
